#NursingNow
Nursing Now

• 3 year global campaign to 2020
• In collaboration with International Council of Nurses and World Health Organization
• Programme of the Burdett Trust for Nursing
• Based on APPG report *Triple Impact*
Campaign vision

To improve health globally by raising the profile and status of nurses worldwide.

By influencing policymakers and supporting nurses to lead, learn and build a global movement.
United Kingdom - A Report by the All-Party Parliamentary Group on Global Health: Triple Impact
How developing nursing will improve health, promote gender equality and support economic growth (2016)
UN High-level Commission on Health Employment and Economic Growth
(The beginnings of a new language, framing nursing as an asset and investment)
“This report makes the very simple point that universal health coverage cannot possibly be achieved without strengthening nursing globally. This is partly about increasing the number of nurses, but also crucially about making sure their contribution is properly understood and enabling them to work to their full potential.

Politicians, non-nursing health leaders and others must work with them to create radical changes in how nurses are perceived and in what they are permitted and enabled to do.”
Triple Impact Report Recommendations:

- **Raise the profile of** nursing and make it **central to health policy**
- **Support plans to increase the number of nurses** being educated and employed globally
- Develop **nurse leaders** and **nurse leadership**
- Enable nurses to **work to their full potential**
- Collect and disseminate evidence of the **impact of nursing on access, quality and costs**, and ensure it is **incorporated in policy** and **acted upon**
- Develop nursing to have a triple **impact on health, gender equality and economies**
- Promote partnership and mutual learning between the UK and other countries
Global launch on 27th February 2018

- Duchess of Cambridge as Patron in London with WHO CNO
- Partners: World Health Organization (WHO) & International Council of Nurses (ICN)
- Dr Tedros in Geneva with global leaders for simultaneous launch
Priority Areas for Nursing Now

• Universal Health Coverage (UHC & NCDs 2018)
• Evidence and Research (targeted and throughout)
• Leadership, Policy and Professional Development (2019)
• Sustainable Development Goals & Economic Growth (2020)
• Sharing Effective Practice (throughout)
Global Action:
- UN Commission NCDs
- Astansa 2018 (Primary Health Care)
- WISH 2018 (Doha)
- Reframing health worker migration
- Commissioning economic research
- Caring included as OECD measure
- State of the World’s Nursing 2020 (WHO)
- Lancet Commission
- DAVOS 2020
- UHC 2030 (UNGA) (NY)
- October 2020 London Conference

Local Action:
- NCDs – Response to draft, inclusion in final WHO report, Implementation plan
- Primary Health Care Alma Ata/Astansa (Oct 2018) – new models of community care
- Nursing Now in country
- Young nurses engagement
- Sharing good practice
- Policy leadership
- Sharing research
- Health worker migration

Accessibility Remoteness Index Australia 2006
ARIA+ and ARIA++ are indices of remoteness derived from measures of road distance between populated localities and service centres. These road distance measures are then used to generate a remoteness score for any location in Australia.

ARIA+ (2006) 1 km grid

- Major cities (0–0.20)
- Inner regional (0.20–2.40)
- Outer regional (2.40–5.92)
- Remote (5.92–10.53)
- Very remote (10.53–15.00)

**Fickle Federation!!**
“Universal Health Coverage” has less currency here as we have Medicare. We do, however, still have major issues with Access.

Could we have a campaign on Nursing: Improving or Enhancing Access for Better Health Outcomes? (Particularly in Primary Health Care)

What might such a strategy look like with Access as the focus?
Levesque et al. conceptual framework of access to health care

- **Approachability**
  - Transparency
  - Outreach
  - Information
  - Screening

- **Acceptability**
  - Professional values, norms, culture, gender

- **Availability and accommodation**
  - Geographic location
  - Accommodation
  - Hours of opening
  - Appointments
  - Mechanisms

- **Affordability**
  - Direct costs
  - Indirect costs
  - Opportunity costs

- **Appropriateness**
  - Technical and interpersonal quality
  - Adequacy
  - Coordination
  - Continuity

---

**Health care needs**

- Ability to perceive
  - Health literacy
  - Trust
  - Expectations

- Ability to seek
  - Personal and social values
  - Culture
  - Gender autonomy

- Ability to reach
  - Living environments
  - Transport
  - Mobility
  - Social support

- Ability to pay
  - Income
  - Assets
  - Social capital
  - Health insurance

- Ability to engage
  - Empowerment
  - Information
  - Adherence
  - Caregiver support

---

Two important suggested foci

Nursing doing its own **internal** homework:
- Australian version of UK “Enabling Professionalism”
- Policy and Leadership Education
- Internships/ Mentorships
- Profile raising challenges

Increasing **access** and **equity**
- Evaluating and publishing existing models.
- Scaling up existing successes.
- Engaging communities to co-create services.
Professional Practice Framework:
What supports all nurses: Regulation, practice environment?
What is needed from the individual nurse?
Building Blocks for positive perceptions

Thousands of nurses, midwives, and patients have designed these building blocks.

1. Everyone having a voice
2. Growing the talent
3. An extraordinary career for young people
4. Showing the pride in the professions
5. Valuing diversity
6. Inspiring & supportive leadership
7. Connecting with our values
8. #hello my name is...
9. Uniting across boundaries
10. Investing in innovation

#FutureNursing #FutureMidwifery

Australian NN Group:

- Reference Group is the CNMO Stakeholder Group; Core Steering Group (CommCNMO, ANMF, ACN, CATSINaM, NN Board member).
- Contact person for contact: Kylie Ward at ACN
- Need to include “young nurses and other young people” and rural & remote
- Need to engage non-nurses with influence, with WHO & politicians
Who can we engage on the Broader National Committee? Ideas please?

• Sportspersons:
• Funders/ Fundraisers:
• Journalists:
• Influential persons:
• Organisations
• Media
• Politics/ health
Nurses need to turn away from being repairers to be again creators of health. Contributing conceptually to what a caring society would be.

(NDr Francis Omaswa, Director of African Center for Global Health and Social Transformation (ACHEST))

Nurses should be the drivers of healthy lives

Prof Ilona Kickbush (Women Leaders in Global Health)
“Without nurses and midwives on the frontlines, universal health coverage cannot happen” - @DrTedros during signing of @NursingNow2020 MoU at @WHO HQ th October, 2018
